DETAILED ACTION

The election with traverse of SEQ ID NO:2 by Applicant in response to restriction requirement mailed out 10/30/2007 is hereby acknowledged. Applicants urge that the special technical feature of the claims is a bi-directional promoter. This is not persuasive because there is no limitation in the claims that mentions a bi-directional promoter and therefore the claims do not contain the alleged special technical feature. Furthermore, upon receiving the election it became clear to the Examiner that a further restriction requirement is necessary to more adequately reflect the Examination of a single invention. In addition to the sequence selection the claims must be elected as follows.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-4, 8-14 and 19-29, drawn to a transgenic expression cassette comprising SEQ ID NO:2 or functional equivalents, a transgenic plant comprising said expression cassette, and a process for transgenic expression of two ribonucleic acids in plants, and seeds therefrom.

Group II, claim(s) 1-4, 8-10, 12, 18-22, 29 and 30, drawn to a transgenic expression cassette comprising SEQ ID NO:2 or functional equivalents, a transgenic non-human, non-plant organism comprising said expression cassette and process for producing pharmaceuticals or fine chemicals.

The inventions are independent or distinct, each from the other because:

Art Unit: 1638

The inventions listed as Group I or Group II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The claims are related by the technical feature of promoter sequences. However, this feature is not special since it does not constitute and advance over the prior art. Benfey et al (Science 250: 959-966) reported characterization of the Cauliflower Mosaic Virus 35S promoter. Therefore, the restriction requirement is proper under these guidelines.

Furthermore, the Invention of Group II does not require the plants, the plant transformation materials and method steps required by Group I, and does require transformation materials and method steps for non-plant organisms which are not required by Group I.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a invention to be examined even though the requirement may be traversed (37 CFR 1.143) **and (ii) identification of the claims encompassing the elected invention.**

The election of an invention may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected invention.

If claims are added after the election, applicant must indicate which of these claims are readable upon the elected invention.

Should applicant traverse on the ground that the inventions are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
